

CUSTOM PLATFORM LIFTS

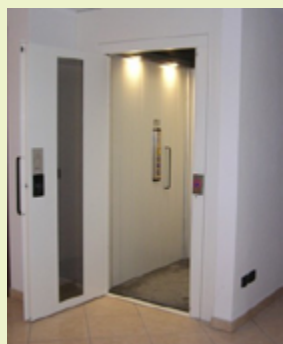

Vertical platform lift model VPL-400 can provide disabled access up to 13M travel.

It can be installed in an existing masonry shaft or complete with its own metal shaft. It requires minimal building work with no separate machine room, low headroom and a 140mm pit.

The shaft and internal cabin come in sizes to suit every project and can be customised to blend in with the surrounding décor.

VPL-400
